

Telephone Distribution Box – 100 Pair

Product Introduction:

Techlogiks 100 Pair Telephone Distribution Box is a versatile plastic box designed to contain various back mount frames and mountings for ancillary components.

The base has generous provision for fixing of cable tie anchors, jumper rings, earth posts and connector mountings.

Three versions of cover are available. The low-profile cover gives an internal clearance of 70mm and will accept a 30mm deep back mount frame (BMF) fitted with connector strips.

The standard cover gives an internal clearance of 90mm and will accept the same BMF & strip with the addition of protector mounts.

A secure version of the standard cover is available with recessed and protected release screws ensuring that a tool is required to remove the cover.

Each cover type is secured by large head quick release screws and has removable side and end panels. The end panels have breakout sections for cable entry.

The 100 Pair Telephone Distribution Box can be used singly or in multiple configurations when the bases are fitted together with base clamps and side or end panels removed.

Technical Specifications

Dimensions	Standard	320H x 210W x 120D (mm)
	Low Profile	320H x 210W x 90D (mm)
Color		Light grey (BT 3P)
Enclosure material		Noryl HF180 Halogen free Impact, Izod notched at 23° C in KJ/m ² Modulus, Flexural in Mpa: - 2100Mpa Flammability, Flame retarded grade
Cover screw material		Nylon 6 GreyT353 (BT 3P)
Rackmount frame		1mm stainless steel T430

Clip – in Accessories

1. Jumper Ring
